FEATURES & CONTACT

A QUIETER EXPRESSION OF WELLNESS

Concealed lighting traces the contours of each pool with a soft, atmospheric glow. Discreetly integrated into the design, it brings depth to the water and lends the surrounding space an intimate sense of calm - from the first moments of dusk to the stillness of the evening.

Classic hydrotherapy and gentle air massage create a refined bathing experience, balancing targeted stimulation with a feeling of weightless relaxation. Balboa control technology and the intuitive SpaTouch system place the essential functions comfortably at your fingertips.

High-quality insulation helps retain the warmth of the water, supporting lasting comfort through the seasons - including in colder regions.
