

PASSION SAUNAS

Discover wellness in your own backyard.

UNIQUE FEATURES

SUPERLOUNGER

A spacious 192 × 60 cm full-length lounger, designed to allow you to lie down completely and enjoy a truly comfortable sauna experience. The Superlounger is 60 cm wide, allowing you to recline comfortably with your arms fully supported, so you can relax completely and enjoy the sauna experience.

COMBI SAUNA

Enjoy the best of both worlds. The Combi Sauna combines traditional Finnish sauna heat with infrared technology, allowing you to choose the experience that suits your mood, from intense heat to a gentler, deeply relaxing infrared session.

ASPEN BENCHES

We use premium A-grade Aspen wood for our sauna benches. Its light and open structure provides a comfortable seating experience, while the knot-free finish creates a clean and refined appearance. Aspen remains comfortable to touch and perfectly complements the natural character of the sauna.

MICROPLASTICS REMOVAL

The combination of a generous amount of wood, a powerful heater and elevated benches creates the ideal environment for an intense traditional sauna experience. The high seating position brings you closer to the heat, allowing you to enjoy the full intensity and benefits of Microplastics removal.

BRONZE GLASS

Our bronze glass gives the sauna a warm, sophisticated appearance that perfectly matches today's design trends. At the same time, it provides additional privacy for the user. The result is a stylish and comfortable sauna environment where you can fully relax and enjoy your personal wellness moment.

WOODEN HANDLES

Both the inside and outside handles are made from natural wood. This creates a warm and premium appearance while ensuring a comfortable and secure grip. Even when the sauna reaches high temperatures, the wooden handles remain pleasant to hold and add another refined natural detail to the overall design.

TRIANGLE BUMPER

A specially designed triangular bumper is positioned underneath the lowest roof shingles. This keeps the shingles raised from the wall, allowing the wood stay dry. The result is protection so you can enjoy your sauna for a long time.

OPTIMISED AIR CIRCULATION

The shape and internal design of the Passion Spas sauna are engineered to promote better circulation of warm air throughout the cabin. This helps the sauna heat up faster and distribute heat more efficiently, creating a more consistent temperature and allowing you to enjoy your sauna experience sooner.

THERMOWOOD WALLS

Passion Spas saunas are constructed using Ball-and-socket Thermowood. Through a natural thermal modification process, the wood's cellular structure is closed, improving durability and reducing expansion and contraction. Thermowood offers characteristics comparable to Class 1 wood and is produced from sustainably sourced timber.

SYNTHETIC CRADLES

The sauna stands on durable synthetic cradles designed to keep the wooden structure dry. This prevents moisture bridges and protects the sauna. Better protection means a longer-lasting structure, allowing you to enjoy your Passion Sauna for years to come.

AMARA SERIES

Amara Series

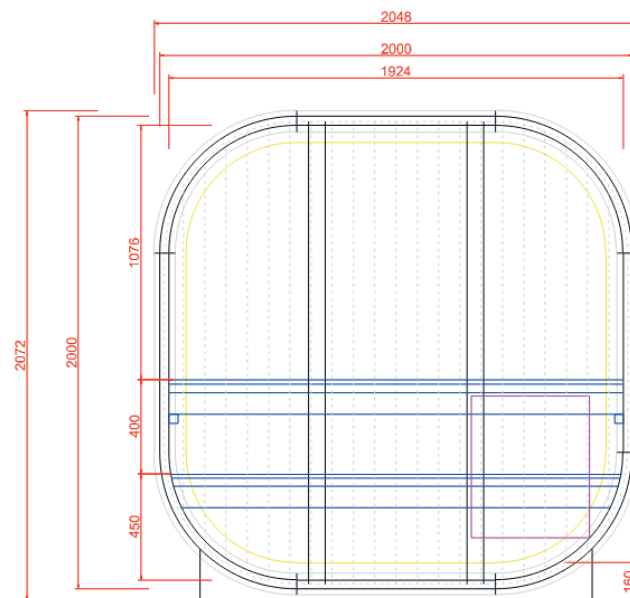

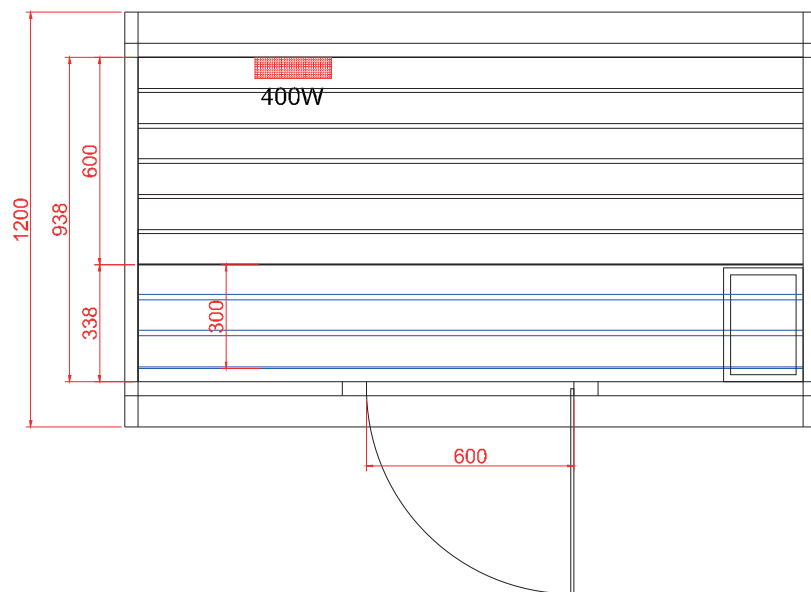

A quiet moment, just steps from home. With its softly rounded shape, natural wood and glass front, the Amara Series brings warmth and calm to your garden. Step inside, leave the day behind and make time to unwind.

YOUR OWN WELLNESS RETREAT

Imagine stepping into your sauna after a long day. The temperature rises, the outside world disappears and there is finally time to relax. Or imagine finishing a workout in your swim spa and moving straight into the warmth of your sauna to relax and recover. With a Passion Spas Sauna, wellness becomes part of everyday life. A sauna next to your spa creates more than two separate products. Together, they create a complete home wellness experience, a private place to relax, recover, recharge and enjoy precious time with family and friends.
